

Turn renovation prospects into clients with this powerful sales tool.

Introducing the

TEMP KITCHEN TM

A portable, working kitchen for your customers during construction.

Prices starting at

\$6495.00

Set your company apart by offering your clients the convenience and utility of a Dwyer Temp Kitchen. Our unit allows the preparation of simple meals and snacks and offers ample storage for food and utensils.

- Fully functional dishwasher with quick and easy plumbing hook ups
- Two full extension stainless steel drawers with 100# drawer glides
- Fold up “breakfast bar” for added counter space
- Optional 1 or 2 burner Ceran cook top
- Electronic management system. One 15 amp circuit is all that is required for our standard unit. Dwyer’s EMS will manage the capacity by preventing multiple appliances from running at the same time.
- Designed with contractors in mind. Made from durable, heavy gauge stainless steel and mounted on lockable wheels, this unit is built to be used over and over again.
